611 EPV KOMPAKT — HYBRID filler - capper & seamer

The brand new 611 EPV KOMPAKT (Glass Bottles and Aluminium Cans & Bottles) is an innovative counterpressure filling system.

It represents the best solution available for entry level automatic carbonated beverage filling for glass bottles and aluminium cans & bottles. Suitable for filling beer and any other carbonated beverages, it features our new EPV (Electro Pneumatic Valve) technology. The EPV valve allows total flexibility in adjusting the filling cycle. It does this by adapting the vacuum and filling timings to the requirements of each different carbonated drink through a user-friendly 7" colour HMI touch screen control panel.

The **611 EPV KOMPAKT** includes 6 Electro-pneumatic Counterpressure filling valves and a single head Capping Turret suitable for various cap applications on glass & aluminium bottles and a single head seamer for cans.

Turret height adjustment system to accommodate different sized bottles/cans.

It is possible to install different cap application requirements eg. ROPP screw cap, Crown Cap, Champagne mushroom cork, Natural straight cork

This model is available to fill glass bottles, aluminium bottles and aluminium cans.

Innovative design with many new and enhanced features including:

- Faster filling cycle up to 850 bph/cph (with still water)
- Higher quality of vacuum for oxygen removal — new high-performance pump
- User friendly 7" colour & PLC HMI touch screen control panel
- Capper for different types of caps
- Seamer with single automatic lid feeding chute
- Ethernet connection available as an option for remote software technical diagnosis and assistance.
- Easy visibility and access from all sides via transparent opening doors for easy maintenance
- Possibility to fill and cap short neck bottles
- Flexibility to fill any size bottle or can
- Easy and rapid changeover from glass bottling to canning
- Product to be filled: Carbonated beer, cider, carbonated soft drinks, kombucha, water, wine and cold coffee
- Filling system: Electro-pneumatic Counter-Pressure valves

Dimensions:

Length: 2800mm

Width: 1150mm

Height: 1830mm (max 2200 - chute height)

Optionals:

- Parts to handle 29mm crown caps
- Inert gas injection prior to capping
- Spray bottle wash tunnel after capping
- Liquid nitrogen dosing for still products
- Under cover CO2 flushing for cans
- UL/CE/CSA electric parts
