

COMPACTBLOCK 222

Rinser - Counterpressure Filler - Twin Head Seamer

Rinser- Counterpressure filler - Seamer "COMPACTBLOCK" for Cans

Product description:

This COMPACTBLOCK has been designed to package carbonated products such as beer, cider and carbonated soft drinks in aluminium cans. 3 phases of packaging in a single steel base, on wheels. Rinsing, counter-pressure filling and seaming.

Machine frame in stainless steel, on lockable castors for easy mobility.

Automatic fill cycle operation through a PLC (which is fully adjustable by the client) for CO2 fluxing of the can prior to counter-pressure filling to reduce oxygen content and therefore extend product shelf life.

Twin head semi-automatic seaming machine for closing two cans at a time.

Stainless steel sprayball inside the header tank & CIP dummy bottles in continuous motion for high pressure internal cleaning of all parts in contact with the product.

The COMPACTBLOCK for filling cans is available in 222, 442 and 662 configurations.

IC FILLING SYSTEMS can also supply stand-alone counterpressure fillers for cans and also a single unit for both glass bottle filling and can filling with the addition of some optional accessories.

Specifications:

- Products: Carbonated Beer, Cider, Water, Soft drinks & Sparkling wine
- Container type: Aluminium cans (or glass bottles with accessories)
- Cap type – Can lid
- Output – up to 500 cans per hour with the 6 valve version (depending on can size & fill temperature)
